The payslip that answers back.

AI payslip delivery and explanation on WhatsApp

Payday is when the questions start.

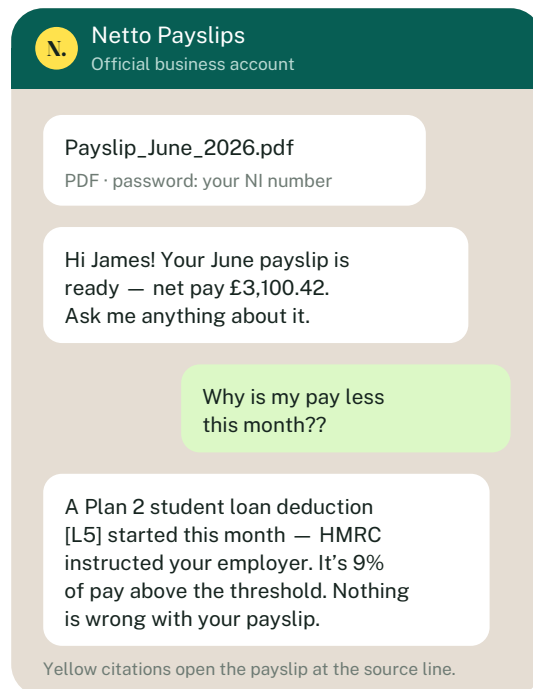

“Why is my pay less this month?” “Was my bonus taxed at 45%?” “What is this deduction?” Every pay run sends the same wave of questions to your payroll and HR team — while most payslips go unread, especially by employees who never log in to a self-service portal.

HOW IT WORKS

- 1 Send us your pay run**
The payslip PDFs or register export your payroll system already produces — uploaded, dropped to SFTP, or emailed. Any payroll software. No IT project.
- 2 We check, you approve**
Netto parses every payslip, matches it to a verified WhatsApp number, and shows you an exception report. One click releases the run.
- 3 Employees ask, Netto answers**
Each payslip arrives on WhatsApp, password-protected. Employees ask questions in plain language and get instant answers grounded in their own payslip — every figure cited to its source line.

Explains. Never calculates.

Your payroll system's figures stay authoritative. Netto's AI only explains them — it cannot invent or alter a number, and every answer cites the payslip line it came from.

WHY EMPLOYERS CHOOSE NETTO

Fewer payday queries

Routine payslip questions are answered instantly, at 9pm on payday — not in your payroll team's inbox on Monday.

Reaches every employee

WhatsApp, not a portal. Built for retail, logistics, hospitality, care and field teams who never log in.

Works with any payroll system

Sage, PaySpace, BrightPay, IRIS, a bureau — if it produces a payslip, Netto delivers it. Live in days.

Compliance built in

UK GDPR & US privacy standards: verified numbers, employee consent, password-protected payslips and proof of delivery.

SIMPLE PRICING

UNITED KINGDOM

£2.50 per employee / month

From £1.50 pepm at 1,000+ employees

All-inclusive: delivery + unlimited AI answers

UNITED STATES
